

Green Credentials

The Best Western Shrubbery Hotel understands that it has a duty to help protect and sustain the local, national and global environment.

The Shepherd family and hotel staff, take this responsibility very seriously and we have already undertaken a number of energy saving measures and are always looking for new opportunities in the hope of further diminishing our carbon footprint.

By working together as a team, together with the support and advice of Green Tourism, we hope to increase awareness and understanding of these environmental issues to create a safe and clean environment for future generations.

Green Policy

1. Ensure legal compliance with environmental legislation and strive to achieve industry best practice.
2. Ensure that all staff members are aware of their duty of care to the environment through in house training and encourage them to participate in the creation of new energy saving ideas and work methods.
3. To encourage biodiversity and flora and fauna within our grounds.
4. Reduce the consumption of raw materials, water and fuels.
5. Measure and record our current energy consumption and strive to reduce it year by year by a set target in areas such as, water and energy consumption.
6. Promote our environmental policy to all guests and customers to increase awareness.
7. Increase our use of recyclable or renewable resources, and only use products and services with minimal environmental impact or high energy efficiency.
8. Conduct regular reviews of our energy consumption and to make sure we are complying with our environmental policy.
9. Ensure that all employees are aware of the above policy and receive training where appropriate.
